TOPICS

With regards to our operating activities so far in the term ending October 2016, there has been intensified recruitment of students who will graduate in March 2016 and a pushing back of schedules for screening new candidates. This has meant that some small and medium-sized enterprises are being forced to continue their recruitment activities even after November. Hence, we are continuing to see an increase in the number of inquiries we receive, centered on those made at the Employment Expo.

In addition, with regards to the recruitment of students who will graduate in March 2017, we are deploying proposal activities that can more promptly and accurately determine the needs of companies that are trying to actively expand. As a result, **the number of inquiries we have received has risen about 1.3 times compared with the same period of last year, and the number is remaining firm.**

**Sales of our products have grown over 35%, posting a record high.
Aiming to achieve another record high during this term.**

■ Breakdown: our products 135.9%, public sector products 64.3%, overall net sales 115.9%.

By reducing our large consignment business and focusing our workforce on in-house product sales, overall sales excluding those of public sector products were 3,937 million yen (2,896 million yen in the same period of the previous year), an increase of 35.9%. Sales of public sector products were 722 million yen, which was almost the expected figure.

■ “Employment Expo” went very well with 5,738 booths at the end of the term, the unit price also followed an improving trend.

The number of times we held Employment Expo increased to 90 times at the end of the term, up from 84 times at the start of the term (75 times at the end of the last term). There were 5,738 booths, up 43.3% year on year, and this demonstrated the high appeal of our products. Unit price has also improved by 1.9%, and inquiries relating to next year are already going steady.

■ Reserve for pension assets increased as a result of recalculating it and also SG & A expenses remained in line with the budget.

As a result of recalculating the reserve for pension assets, which is done once every 5 years, the number of employees increased and the retention rate improved. This meant that retirement benefit costs came to 77 million yen, and also SG & A expenses remained in line with the budget. Last year, we had already assumed retirement benefit costs would increase from the beginning of the term due to personnel expenses that had been recorded as a cost of public sector products.

■ Another change of schedule in the job hunting season meant number of inquiries in 1Q was also up year on year.

In the job hunting schedule that has just been changed this year, we forecast that major companies will shift the start of their screening to June from August. Hence, each company will be forced to re-examine their recruitment plan. The number of inquiries we received from June to August at the Employment Expo increased after we issue reports. Hence, the number of inquiries we receive stayed firm, up about 1.3 times year on year.

Asagaku Navi

Asahi Gakujo Navi 2016

- Feature 1 We have greatly differentiated our site from others, eliminating bulk entry of players.
- Feature 2 Showing on a balloon information that makes employers feel "I want to meet this job seeker."
- Feature 3 Unique search leads: "level of expectation for growth."
- Feature 4 Further strengthening the linkage with the event. "Realizing matching with a high degree of aspiration."

Highly rated by both universities and companies

Ongoing needs, with strong demand to employ young people and increasing difficulty of employing new graduates.

Aiming to further expand, in line with the government's policy of having "100 million people actively working."

Site to support those in their 20s who are trying to find employment or change their career

(Millions of yen)

POINT

Following on from Asagaku Navi 2017, we plan to introduce a recommendation-type matching system that uses artificial intelligence (AI).

- Needs are currently expanding, with increasing and ongoing difficulty of employing those who will newly graduate in 2016.
- Figures of 191.6% year-on-year in the Tokai region and 140.0% in the Kansai region, show that even in areas outside the Tokyo metropolitan area there are increasing needs to employ young adults.

Latest data (October 2015)

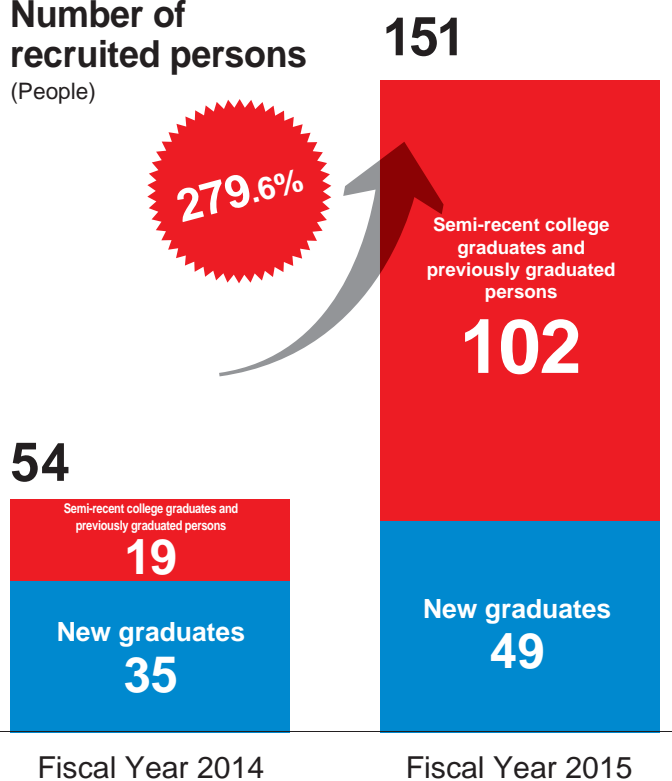

Monthly net increase in membership	108.3% (Year on year)
Monthly number of entrants	108.8% (Year on year)

The number of young adults who have found employment has increased, and from now on we will further strengthen our service for recruitment of new graduates.

Recruitment Business

Number of recruited persons
(People)

POINT

At last, also implementing a function in “Asagaku Navi” that lets people register their desire to be recruited!

- Number of people who have registered for Re-Shukatsu **32,050**
- Enhancing the number of operating staff
End of previous term 2 people → **10 people** [Tokyo, 5
Osaka, 5]
- Increasing the counseling space
Greatly increasing the number of counselees on the first floor of our headquarters
(Roughly double when the traditional counseling space on the second floor of the headquarters is included)
- Increasing the number of requests with our company-wide sales system
End of previous term 166 cases → End of Oct. **435 cases**

No. of inquiries is on the rise

TOPICS

With ongoing inquiries from overseas organizations, this term we will finally make a big leap forward.

Background

Change to the start of job hunting means that there are increasing needs for prior contact with applicants

Environment in which it is becoming more difficult to secure young workers, part-timers and those doing a side job

Growing needs for career education to foster vocational outlook in students

Proposal

Implementing "paid internship" that is different from the existing internship, part-time jobs

Points

1. Covering a wide range of students from all years of study, and not only those about to start job hunting activities
2. Our staff and current students take part in planning and running the system
3. Increased rate of matching for both companies and students with "I'm interested!" search
4. Two types of cost plan to suit your needs: "billing at employment" and "billing during posting"

TOPICS

- 82.4% of the members are 18 to 20 years old
- 67.8% of Kanto members are GMARCH or higher
65.3% of Kansai members are four leading private universities (Kwansei Gakuin University, Kansai University, Doshisha University, and Ritsumeikan University) or higher
Attention is being placed on by highly skilled human resources
- Other than the companies listed, international organizations are also examining using our system one after another
- Events to enlighten students are also held from time to time

By focusing on selling our own products, profitability is increasing every year.

Breakdown of sales

Number of employees is also increasing steadily. We are continuing to ensure that we secure human resources in the Tokyo metropolitan area.

Equipped with new features, we aim to create a site that places even more importance on matching accuracy.

POINT

Recommendation-type matching system that uses artificial intelligence (AI)

- While continuing to use Mitsuki Takahata as our image character, we are also further enhancing the content made in cooperation with the Asahi Shimbun
- Unique search leads
 - Search with growth keywords
 - Search with work images
 - Search for companies that utilize their employees' abilities
- Introducing a dedicated app to enhance the attraction of Employment Expo
 - 62.4% of users access via a mobile device (49.3% last year)

We are promoting the three principles of employment — “inform,” “meet,” and “let them do as they like” — by strengthening the linkage between the web and events.

She has been decided as the heroine of NHK's morning TV drama series "Toto nee-chan" from next April!

Medium-term management plan

- Further strengthening the Kanto region
- Creating and expanding new services such as Intern Jobs
- Increasing the product competitiveness of Asagaku Navi and Re-Shukatsu
- Further focusing on the recruitment business... and others

Dividends

Basic Policy on Profit Distribution

We believe that returning profits to all shareholders is an important management issue. But we also emphasize the need for a good balance between this and internal reserves that are required for investments in growth, such as those for maximizing corporate value and developing human resources and new businesses that are essential for future business expansion. And our basic policy is to return surplus funds to shareholders as much as possible after taking into account the state of our cash flow and securing internal reserves, while considering that balance.

TOPICS

For the 39th term, the interim dividend was 14 yen and we plan to pay a year-end dividend of 14 yen, making for a total annual dividend of 28 yen.
